

CHRONIC DISEASES IN AMERICA

6 IN 10

Adults in the US have a **chronic disease**

4 IN 10

Adults in the US have **two or more**

THE LEADING CAUSES OF DEATH AND DISABILITY
and Leading Drivers of the Nation's **\$3.5 Trillion** in Annual Health Care Costs

HEART DISEASE

CANCER

CHRONIC LUNG DISEASE

STROKE

ALZHEIMER'S DISEASE

DIABETES

CHRONIC KIDNEY DISEASE

THE KEY LIFESTYLE RISKS FOR CHRONIC DISEASE

TOBACCO USE

POOR NUTRITION

LACK OF PHYSICAL ACTIVITY

EXCESSIVE ALCOHOL USE

NCCDPHP PREVENTS CHRONIC DISEASE AND PROMOTES HEALTH FOR PEOPLE OF ALL AGES

IMPROVING QUALITY OF LIFE

INCREASING HEALTHY LIFE EXPECTANCY

REDUCING HEALTH CARE COSTS

WE WORK TO IMPROVE HEALTH ACROSS THE LIFE SPAN

Where People Live, Learn, Work, and Play

Infants

Reduce the leading causes of infant death and illness.

Children and Adolescents

Help support healthy communities, child care programs, and schools so children can eat well, stay active, and avoid risky behaviors.

Adults

Help adults lead healthy and active lives and increase the use of preventive services like cancer screenings.

Older Adults

Promote quality of life and independence for people as they age.

WHAT WE DO

Find out how chronic diseases affect populations in the United States.

Study interventions to find out what works best to prevent and control chronic diseases.

Fund and guide states, territories, cities, and tribes to use interventions that work.

Share information to help all Americans understand the risk factors for chronic diseases and how to reduce them.

HOW WE DO IT

Measure

how many Americans have chronic diseases or chronic disease risk factors.

Improve

environments to make it easier for people to make healthy choices.

Strengthen

health care systems to deliver prevention services that keep people well and diagnose diseases early.

Connect

clinical services to community programs that help people prevent and manage their chronic diseases and conditions.

OUR IMPACT

Since 2012, the *Tips From Former Smokers*[®] campaign has motivated over 500,000 cigarette smokers to quit for good.

The percentage of adults meeting the national guideline for aerobic physical activity increased from 44% in 2008 to 54% in 2017.

The percentage of adults who have their high blood pressure under control increased from 43.3% in 2005–2006 to 48.5% in 2015–2016.

Teen birth rates fell 55% from 2007 to 2017—an all-time low.

From 1999–2004 to 2011–2016, the percentage of low-income children with dental sealants increased 75%.

Over 297,000 people have participated in the National Diabetes Prevention Program lifestyle change program.

Since 1991, the National Breast and Cervical Cancer Early Detection Program has served 5.4 million women and found 65,879 cases of breast cancer and 207,727 precancerous cervical lesions.

From 2000 to 2014, 30% more schools offered at least 2 vegetables at lunch.
