## The average maximum <br> employer match for a 401 (k) or similar plan was 6\%.

## Key Findings

- Tuition: 61 percent of employers offered tuition reimbursement. The average maximum reimbursement allowed for tuition/education expenses per year was approximately $\$ 4,000$.
- Compensation: The average annual salary increase was 2.7 percent each year. The average target bonus percentage for nonexecutives was 4.7 percent compared to 10.2 percent for executives.
- Retirement: Among those companies that offered a 401(k), 402(b) or similar plan (92 percent), an average of 66 percent of employees participated. The average maximum employer match was 6 percent.
- Succession Planning: One-third of companies (34 percent) had a succession plan. The positions most commonly included in an organization's succession plan included the executive team ( 76 percent), senior management ( 71 percent) and middle management (46 percent).
- Management Responsibility: Those employees in middle management positions had the most direct reports (a median of 8 direct reports) compared to those at the executive level (a median of 5 direct reports).

## Statistical Definitions

## " $n$ "

The letter " n " in tables and figures indicates the number of respondents to each question. In other words, when it is noted that $\mathrm{n}=25$, it indicates that the number of respondents was 25 .

## Percentile

The percentile is the percentage of responses in a group that have values less than or equal to that particular value. For example, when data are arranged from lowest to highest, the 25th percentile is the point at which $75 \%$ of the data are above it and $25 \%$ are below it. Conversely, the 75th percentile is the point at which $25 \%$ of the data are above it and $75 \%$ are below it.

## Median (50th percentile)

The median is the midpoint of the set of numbers or values arranged in ascending order. It is recommended that the median is used as a basis for all interpretations of the data when the average and median are discrepant.

## Average

The average is the sum of the responses divided by the total number of responses. It is also known as the mean. This measure is affected more than the median by the occurrence of outliers (extreme values). For this reason, the average reported may be greater than the 75th percentile or less than the 25th percentile.

## Organizational Data
